

HEAVY DUTY MAGNETIC CONTACT NYSMC501

Features: NYSMC501

- Used for protecting all type of doors and windows.
- High quality of ABS material
- Available wider gap distance
- Convenient surface mounting

Specifications

- **Size:** 50 x 11 x 11
- **Max. Contact Rating:** 28 VDC ; 0.5A ; 10W
- **Net Weight:** 22 gm.
- **Color Available:** White
- **Magnetic Contact Type:** Normally Close (NC)
- **Sensor Range:** 32 mm (±5%)
- **Installation:** Surface Mount
- **Wire Length:** 280 mm

NYSCOM Magnetic Contact Sensor **NYSMC501** is specially designed for protecting all types of doors and windows. The door contact sensors are suitable for central or standalone control monitoring systems. It can be used for closed circuit wiring. When the door open or circuit is open, the monitoring system will trigger instantly and vice versa.

The model is molded with the highest engineering precision. The ABS material used is noted to be high resistance to heat and with good impact strength.
